OBJECTIVE

Computer Science and Software Engineering student (3.95 GPA) who builds and maintains software other people depend on, including a Discord bot serving 14,000+ members across 60+ servers. Strong foundation in Java and C#, with hands-on experience in full SDLC documentation and Agile teamwork. Seeking a Summer 2027 software engineering internship.

EDUCATION

University of Michigan - Flint

Flint, MI

Bachelor of Science, Double Major in Computer Science and Software Engineering

Expected Dec 2027

Cumulative GPA: 3.95/4.0; Dean's List

- Relevant Coursework: Data Structures; Software Engineering; Discrete Structures; Operating Systems; Software Construction

Genesee Career Institute

Flint, MI

Game Programming

Sep 2022 - Jun 2023

Cumulative GPA: 4.0/4.0

- Studied game design principles, logic structures, game theory, and development methodologies.
- Developed and edited games in C# with a focus on level design and interactive elements.

PROJECTS

Geospatial Claim Visualization Tool

Jul 2025 - Sep 2026

Independently designed and built a Java mapping service that tracks 2,400+ region claims on a live game server and renders them on demand.

- Integrated a Discord bot (JDA) serving 14,000+ members across 60+ servers, exposing 13 slash commands for lookups, wealth and land leaderboards, player markets, and ban history.
- Implemented automated diffing of region data every minute to detect and highlight added, removed, or modified claims, eliminating manual monitoring.
- Shipped v2.0 in Aug 2026, rewriting the monitor cycle around an in-memory diff with a single parse.
- Parsed structured JSON to render territory boundaries with accurate coordinate scaling and image cropping.

Software Engineering Term Project, UM-Flint CIT

Jan 2025 - Apr 2025

Collaborated in a 4-person team to produce 150+ pages of full SDLC documentation for a proposed client-facing application.

- Completed SRS, PMP, architectural design, and test plan documentation despite implementation being halted due to external client constraints.
- Analyzed client requirements to conduct stakeholder analysis, develop use cases, UML diagrams, and risk assessments.
- Led estimation and task breakdown using Scrum principles to define sprint objectives, timelines, and testing protocols.

TECHNICAL SKILLS

Languages: Java, C#, C++, Python

Tools & Platforms: Git, Maven, Linux, VSCode, JetBrains IDEs

Libraries & APIs: JDA (Discord API), Jsoup

Methodologies: Agile, Scrum, SDLC, UML

EXPERIENCE

UM-Flint Recreation Center

Aug 2026 - Present

Facilities Operations Coordinator

- Contributed to the hiring process for professional staff by reviewing applications and conducting structured interviews, gaining hands-on experience with evaluation, collaboration, and decision-making in a formal selection setting.
- Oversaw day-to-day operations, including opening/closing procedures and monitoring other student staff to ensure consistent, issue-free workflows.
- Diagnosed and resolved facility issues in real-time, applying a systems-oriented approach to improve reliability, efficiency, and user experience.
